Sub: Requesting Research studies/ abstracts for nursing research database in India

Dear Sir/ Madam,

Greetings from Nursing Research Society of India

NRSI was established in 1987 with the main aim of providing a platform for nurse scientists to share their views and experiences and disseminate the findings of their research undertakings.

The society completed its twenty five years of excellent performance and celebrated its Silver Jubilee in the year 2012.

In India, the number of Master's level nursing education institutions have increased in the recent past. All the research studies conducted by the M.Sc. students do not get published. Their theses usually remain stacked in their own college and university libraries, not even available for reference to the nurse scientists in other colleges.

NRSI publishes its journal only twice a year. Similarly, there are a few more journals of repute being published in India but their periodicity is also twice or four times a year.

The NRSI executive board therefore, thought of inviting the list of studies conducted by the M.Sc. and PhD students of all the P.G.colleges, with the intention of creating a database of 'Indian nursing Studies' and make the list available on its website www.nrsindia.org.

You are requested to send us the list of all those studies done by you or in your college according to the format as given below:

Name/ Guide's name/ problem statement/year/name of the college/ 300 words abstract/e. mail and contact no. of the researcher. If published, name of the journal vol. no.

Kindly send it by email at the earliest on the following email ids.

nrsiindia@gmail.com , usha_mullick@yahoo.com

Your co-operation in this will go a long way in helping the young nurse scientists to find a place for their research studies on the website. This will also help those who are looking for studies done in Indian settings for reference.

The database thus created could also be used by the editors of the journals to invite selective studies for publication. Do send the list at the earliest.

With the kindest of regards and best of wishes from your own NRSI.

Yours truly

Dr Usha Ukande, President NRSI
